## WORK EXPERIENCES

### Applications Specialist III

SCUSD | 2021 - Present

Developed and deployed YellowLabels, a web application that automated label printing for Sacramento City Unified School District Warehouse, boosting operational efficiency. Managed a large software project to enhance food distribution across 80+ school sites by implementing an efficient online ordering system for Nutrition Services.

Node.js, Express.js, MongoDB, React.js, REST API, Passport.js, Heroku Cloud, Agile Methodologies

### Full-Stack Web Developer

USAID | 2016 - 2020

Developed and managed websites for the Passage to Prosperity: India-Afghanistan Trade and Investment Show, enabling traders, visitors, and investors to register and access essential information. Designed web portals to improve employee access to project resources within the USAID/Afghanistan Mission.

HTML/CSS, JavaScript, UI/UX Design, Responsive Web Design, User Authentication

### IT Project Manager

AUWSSC | 2014 - 2016

Managed and deployed a major billing application at Afghanistan Urban Water Supply and Sewerage Corporation (AUWSSC), improving customer service and adding advanced reporting features. The system enhanced payment tracking, resulting in a 15% increase in revenue.

Software Project Management, System Integration, Business Process Automation

### IT Support Specialist

MOF | 2009 - 2014

Played a key role in the deployment of FreeBalance software (Afghanistan's Financial Management Information System) across 150+ government offices as part of a World Bank project. Contributed to infrastructure design and directly trained over 1,000 employees, ensuring a smooth and successful implementation.

Project Coordination, IT Infrastructure Design & Deployment, Training & User Support

## PROJECTS

### YellowLabels – Automated Label Printing System

Developed and deployed a web-based label printing application for Sacramento City Unified School District Warehouse, streamlining operations and improving efficiency. The system reduced the label design and printing process from 15 steps to just 3, significantly cutting down time and manual effort. Integrated Zebra's API to seamlessly connect with a Zebra industrial printer, ensuring fast, accurate, and automated label generation.

### DevMate – Developer-Centric Content Management System

Built and designed DevMate, a CMS created for developers to easily create, manage, and publish blog content. With a developer-first approach, the system streamlines content creation, offering greater flexibility and control. Currently transforming DevMate into a headless CMS with AI-powered content refinement and SEO optimization to make it more scalable and publicly accessible.

## SKILLS

### Technical

HTML/CSS/Bootstrap  
JavaScript/jQuery/React  
Node.js/Express.js/Mongoose  
PostgreSQL/MongoDB/MySQL  
Git/GitHub/Jira  
Cypress/Jest  
AWS/Docker  
Figma/Postman/VS Code

### Professional

Effective Communication  
Team Player  
Strong Problem Solver  
Good Time Management

## EDUCATION

BSc Computer Science - 3.9 GPA  
Kardan University  
2009 - 2013

## LANGUAGES

Pashto (Native)  
English (Professional)

## EVENTS

MongoDB GenAI Hackathon  
Google Cloud Next 2025
